

a state-of-the-art  
residential and dementia home  
in the heart of Dorchester

# Care South residential care

We know that selecting a care home can be a difficult decision. The information below aims to help you understand why Maiden Castle House is the right choice for high quality care delivered within a safe and caring environment. You are bound to have questions so please feel free to ring us to discuss any queries you may have or why not pay us a visit and see how Care South can help with your care needs.

Maiden Castle House is a newly built, state of the art residential and dementia care home in the heart of Dorchester. We provide a safe and caring environment where residents can live their lives as if in the comfort of their own home, but cared for by dedicated staff, highly trained to nationally recognised standards.

Whether you seek care for the physically frail or those with dementia, we have 56 en suite single rooms that are divided into two units to

maintain a homely atmosphere. Our dementia care unit has been designed in conjunction with an international dementia care consultant with features such as themed memorabilia cabinets and a beautifully restored Austin Mini to evoke memories and stimulate a sense of well-being as well as creating a focal point for residents and visitors.

Following full assessment prior to admission of each individual, lifestyle

preferences and activities will be discussed with each resident and their family. Care is provided on a needs-led basis for male and female residents with low, medium and high care needs.

While we have the very best in care and facilities, the key to our residents' happiness is how it's delivered. So, within our "home from home" environment, we provide individual care with privacy, dignity and respect in an atmosphere of reassurance, warmth and affection.

To deliver this level of care and support we have warm and friendly staff who are dedicated to the happiness and well being of our residents.

There are many additional facilities and services designed to make life as pleasurable and normal as possible at Maiden Castle House. We have lounges and several other communal areas, a quiet room and two tranquil central courtyards provide areas for peace and reflection as well as social

interaction. We also have an in-house laundry service and hair salon and our chefs prepare a wide choice of meals, snacks and drinks as well as catering for special dietary needs.

In other areas of everyday life we provide assistance with dentists, opticians and chiropody. We have regular church services covering Baptist, Evangelical and Christian Fellowships and a shop providing basic essentials.

We know our residents enjoy a wide variety of entertainment and our full calendar of activities is too great to list here! However, it does include bingo and quiz nights, beauty and music sessions, occasional minibus trips, and coffee mornings.

**Please come and visit us at Maiden Castle House and experience our unique and caring approach for yourself.**

If you are looking for a residential and dementia care home where dignity, respect, laughter and happiness are central to the philosophy of care then call the Home Manager on 01305 251661.
